L2 SIGNALS PRO

Founding Members Programme

PROGRAMME STATUS	MEMBERSHIP CAPACITY	SERVICE
Planned Launch 2027	**50 Members Maximum**	**Premium Access to L2 Signals Trading Signals**

01 Programme Overview

The L2 Signals Founding Members Programme is an early-access membership initiative for traders who want access to the platform’s systematic intraday trading signals.

L2 Signals is being developed to provide a structured, rules-based approach to intraday trading through a deterministic signal engine designed to identify trading opportunities using predefined market conditions and technical filters.

The founding programme will introduce a limited group of members to the signal service while L2 Signals continues to develop its technology, validate its strategies, and improve its delivery infrastructure.

Founding members will receive access to the designated signal group and the benefits expressly described in this document.

02 Membership Capacity

Founding membership is limited to a maximum of **50 members**.

Membership availability will be determined by the number of places remaining when registration opens.

Joining the waitlist does not constitute a paid subscription or guarantee membership. A place will be confirmed only after the applicable registration and payment requirements have been satisfied.

L2 Signals reserves the right to close registration when the founding membership reaches capacity.

03 Subscription Pricing

Founding membership will be offered at the following fixed monthly rates:

NIGERIAN MEMBERS	NON-NIGERIAN MEMBERS
₦50,000	**US$40**
per month	per month

Accepted payment currencies and methods may include Nigerian naira, US dollars, and supported cryptocurrencies.

The applicable subscription price will be determined by the member’s designated pricing category and communicated before payment.

Where cryptocurrency is accepted, the payment amount, supported network, designated payment address, and any applicable transaction requirements will be communicated through the official payment instructions.

Members are responsible for ensuring that payments are sent using the correct asset, network, and payment details.

04 Membership Access

A confirmed founding member will receive access to the designated L2 Signals signal group for the duration of their active subscription.

The service is intended to provide trading signals and associated information, which may include:

- Trading instrument and direction.
- Proposed entry price or entry zone.
- Stop-loss level.
- Take-profit level or levels.
- Signal status and relevant updates.
- Other trading information made available through the service.

The exact signal format and delivery process will be communicated before launch.

Membership provides access to the signal service. It does not automatically include unrestricted access to the underlying L2 Signals application, source code, internal strategy parameters, administrative tools, or signal-generation infrastructure.

Any additional features will be included only where expressly stated in the applicable membership offer.

05 Founding Member Performance-Based Extension

L2 Signals will provide eligible founding members with a one-time additional month of signal-group access if the eligible L2 Signals signals recorded during their first paid subscription month produce a cumulative net result of zero R or below, measured in R-multiples.

The extension is intended to provide additional access to the service when its measured performance over the member's initial paid month is zero or negative.

The following conditions apply:

1. The member must have completed their first paid subscription month.
2. The applicable performance period must have concluded.
3. The eligible signals must have been evaluated under the official L2 Signals Performance Measurement Policy.
4. The cumulative net result for that period must be zero R or below.
5. The member will receive one additional month of signal-group access without an additional subscription charge.

> A cumulative net result **above zero R** does not qualify for the extension. The extension is available **only once** per founding member and applies exclusively to the first paid subscription month. No additional performance-based extension will be provided for subsequent paid months.

06 Nature of the Extension

The performance-based extension is an additional service-access benefit.

It is not a cash refund, reimbursement of trading losses, compensation for losses incurred in a personal trading account, or a guarantee that future signals will be profitable.

The extension does not guarantee that a member will recover previous trading losses or achieve a positive result during the additional month.

Members remain responsible for their own trading decisions, execution, position sizing, and risk management.

The eligibility calculation will be based on the official L2 Signals performance records, not on the individual profit or loss of a member’s personal trading account.

07 Subscription Continuation and Cancellation

After the initial paid month, members may continue their subscriptions under the applicable renewal terms.

Members who qualify for the additional free month will retain signal-group access for that extension period without an additional subscription charge.

After the extension period ends, members may choose to renew their subscriptions or discontinue the service.

Members who do not qualify for the extension may also cancel according to the applicable cancellation terms.

Cancellation does not entitle a member to a refund for a completed subscription period unless otherwise required by applicable law or expressly provided under the Subscription Terms and Conditions.

08 Trading Risk and Performance Limitations

Trading financial instruments involves risk, including the possibility of losing some or all of the capital allocated to trading.

Historical results, backtests, forward tests, and previously profitable signals do not guarantee future performance.

Actual results may differ from published signal outcomes because of spreads, slippage, execution delays, broker conditions, market volatility, and differences in individual trading practices.

L2 Signals does not promise a specific win rate, profit factor, monthly return, or amount of profit.

The performance-based extension described in this programme must not be interpreted as a guarantee of profitability.

09 Application Access and Service Security

Founding membership grants access to the designated signal service, not unrestricted access to the underlying application or internal infrastructure.

Members must not attempt to bypass access controls, interfere with the signal-generation system, access administrative functions without authorization, or exploit technical vulnerabilities.

Members must not redistribute restricted membership content or share private access credentials without authorization.

Further requirements will be established in the Privacy and Acceptable Use Policy.

10 Programme Updates

L2 Signals may refine its service delivery, technical infrastructure, and operational procedures as development progresses.

Any material changes affecting the agreed subscription price, membership benefits, or extension eligibility will be communicated to members in accordance with the applicable subscription terms and consumer-protection requirements.

No change will retroactively remove an extension benefit that a member has already qualified for under the applicable terms.

11 Acceptance of Terms

Participation in the founding programme will be subject to the L2 Signals Subscription Terms and Conditions, Performance Measurement Policy, Founding Member Extension Policy, Trading Risk Disclosure, and other applicable service policies.

Members will be expected to review and accept the applicable terms before their subscriptions are activated.

L2 SIGNALS — Systematic Trading. Measured Performance. Structured Execution.
