

L2 SIGNALS PRO

Subscription Terms & Conditions

STATUS	EFFECTIVE DATE	APPLIES TO
Draft for review	To be announced	All subscribers, including founding members

01 Introduction

These Subscription Terms & Conditions govern access to L2 Signals, a systematic intraday trading signal platform designed to provide structured trading signals based on predefined strategy rules and market conditions.

By subscribing to L2 Signals, making a subscription payment, or accessing the members-only service, you acknowledge that you have read and agreed to these terms.

If you do not agree with these terms, you should not subscribe to or use the service.

02 Description of the Service

L2 Signals provides trading signals generated by its systematic signal engine.

Depending on the signal and the service features available at the time, information may include:

- Financial instrument.
- Trade direction.
- Entry price or entry conditions.
- Stop-loss (SL).
- Take-profit (TP).
- Signal status and relevant updates.
- Cancellation notices and other trade-management instructions.

Signals are generated when the engine identifies conditions that satisfy its predefined strategy rules and filters.

L2 Signals does not guarantee that a signal will be generated every day or during any particular period.

The service will not generate signals merely to maintain activity or satisfy a subscriber's preferred trading frequency.

The precise features available to subscribers may change as the platform develops, subject to these terms and any applicable service announcements.

03 Subscription Plans and Pricing

L2 Signals uses the following monthly subscription prices:

SUBSCRIBER CATEGORY	MONTHLY SUBSCRIPTION
Nigerian subscribers	**₦50,000**
Non-Nigerian subscribers	**US$40**

The applicable price is determined by the subscriber category assigned during onboarding.

Subscription prices are fixed at the published rates unless L2 Signals announces a change.

Any future price changes will be communicated to affected subscribers before they take effect. Unless otherwise stated, a price change will apply to future subscription periods rather than retroactively changing a payment already completed.

04 Accepted Payment Methods

L2 Signals may accept subscription payments in:

- Nigerian naira (NGN).
- United States dollars (USD).
- Supported cryptocurrencies.

The specific payment methods, supported cryptocurrency networks, wallet addresses, and payment instructions will be communicated through official L2 Signals channels.

Subscribers are responsible for verifying the payment instructions before sending funds.

For cryptocurrency payments, subscribers must use the exact asset and network specified in the official instructions.

L2 Signals is not responsible for losses resulting from payments sent to incorrect addresses, unsupported networks, incorrect assets, or unauthorised third-party addresses.

Where applicable, subscribers are responsible for transaction fees, network charges, and other costs associated with making payments.

A subscription payment is considered complete when L2 Signals has verified receipt of the required amount.

Sending a payment without successful verification does not automatically activate subscription access.

05 Subscription Activation and Access

Subscription access begins once the payment has been received and verified and the subscription has been activated.

Subscribers will receive access to the designated members-only communication channel or other delivery method provided by L2 Signals.

Access is personal to the subscriber and may not be transferred, resold, or shared with unauthorised individuals.

Subscribers must maintain the security of their accounts and access credentials.

L2 Signals may restrict or revoke access where there is evidence of unauthorised sharing, abuse, fraud, or a material breach of these terms.

06 Calendar-Month Performance Measurement

L2 Signals measures official signal performance using calendar months.

Each performance period begins at 00:00 on the first day of the month and ends at 23:59:59 on the final day of the month, using West Africa Time (WAT, UTC+1).

Monthly net R resets to zero at the beginning of each new calendar month.

This performance calendar is independent of individual subscription dates and payment timing.

Consequently:

- A subscriber who joins mid-month falls under that month’s official performance record.
- A subscriber who renews early remains subject to the same calendar-month performance cycle.
- A subscriber who pays late does not receive a shifted performance measurement period.
- Personal subscription dates do not create separate individual net R calculations.

The official performance result is determined using the L2 Signals signal engine’s recorded outcomes under its documented rules.

Members’ individual account balances, profits, losses, and personal net R do not determine official platform performance.

The full methodology is set out in the L2 Signals Performance Measurement Policy.

07 Signal Performance and Individual Trading Responsibility

L2 Signals provides structured trading signals, but each subscriber remains responsible for their own trading decisions and account management.

Subscribers are responsible for reviewing and following the published instructions, including entry conditions, stop-loss, take-profit, and subsequent official updates.

A subscriber may obtain a different result from the official signal outcome because of:

- Entering at a different price.
- Entering late or before the specified conditions are met.
- Widening, removing, or otherwise changing the stop-loss.
- Moving the take-profit beyond the published target.
- Closing a trade prematurely.
- Ignoring a signal update or cancellation.
- Broker pricing, spreads, slippage, or execution delays.
- Rejected orders, trading fees, or other execution conditions.
- Position sizing, leverage, or other personal risk decisions.

These differences do not change the official outcome recorded by L2 Signals.

For example, if the official signal reaches its published take-profit but a subscriber moves their take-profit further away and subsequently fails to close at that level, the subscriber's different result does not change the official signal result.

Similarly, if a subscriber ignores a published stop-loss and incurs a larger personal loss, that additional loss does not alter the official signal's recorded R.

L2 Signals' official performance is measured from the signal engine, not from the founder's personal trading account or any subscriber's trading account.

L2 Signals will not be responsible for individual trading outcomes caused by a subscriber's departure from published instructions or by personal execution decisions.

This provision does not excuse errors in L2 Signals' official records or misrepresentations of its reported performance.

08 No Guarantee of Profitability

L2 Signals does not guarantee that subscribers will make profits, avoid losses, achieve a particular win rate, or receive a minimum number of signals.

Trading financial markets involves risk, including the possibility of losing some or all of the capital allocated to trading.

Historical, backtested, forward-tested, or previously reported performance does not guarantee future results.

Subscribers should independently assess their financial circumstances, experience, and risk tolerance before acting on any signal.

Subscribers are responsible for determining appropriate position sizes and for ensuring that their trading activities are suitable for their own circumstances.

L2 Signals' subscription fee purchases access to the service. It does not purchase guaranteed profits or a promise that the subscriber's individual account will achieve the same results as the signal engine.

09 Founding Members Programme

The Founding Members Programme is an early-access subscription programme planned for the 2027 launch.

Participation is subject to availability and confirmation by L2 Signals.

The programme is capped at a maximum of 50 founding members.

Unless expressly stated otherwise in writing, founding members remain subject to the applicable subscription price and these Subscription Terms & Conditions.

Founding-member status does not guarantee preferential trading outcomes, a minimum number of signals, or permanent access to the service regardless of subscription status.

Additional benefits, eligibility requirements, and programme-specific conditions may be communicated in the official Founding Members Programme document.

10 One-Time Founding-Member Extension

Eligible founding members may qualify for one additional month of subscription access under the founding-member extension policy.

The extension is subject to the following conditions:

1. It applies only after the member's first paid subscription month.
2. Eligibility is determined using the official L2 Signals net R for the applicable calendar-month measurement period.
3. A confirmed official monthly net R below zero qualifies for the extension.
4. A confirmed official monthly net R equal to zero also qualifies for the extension.
5. A confirmed official monthly net R above zero does not qualify.
6. The extension may be granted only once per eligible founding member.
7. It does not apply repeatedly to subsequent paid months.

The official monthly result must be finalised under the Performance Measurement Policy before eligibility is confirmed. If signals remain open at month-end, finalisation may occur after those signals' outcomes have been established.

The extension is based exclusively on L2 Signals' official signal-engine performance.

It is not based on the subscriber's personal trading account, individual net R, balance, or monetary profit or loss.

For example, if a subscriber personally loses money but the official L2 Signals monthly net R is positive, that personal loss does not qualify the subscriber for the extension.

Conversely, if the official monthly net R is zero or negative, an otherwise eligible founding member may qualify even if their individual account results differ.

The extension provides additional access to the L2 Signals service. It is not a cash refund, reimbursement of trading losses, or guarantee of future profitability.

The extension is governed by the Founding Member Extension Policy and Performance Measurement Policy.

11 Renewal and Late Payment

Subscriptions are paid monthly.

Subscribers who wish to continue receiving access must renew their subscriptions according to the payment instructions communicated by L2 Signals.

Where a subscription expires without successful renewal, access may be suspended until payment is received and verified.

Late payment does not alter the official calendar-month performance cycle or create a new performance period.

L2 Signals may restrict access while a subscription remains unpaid.

Subscribers should not assume that payment alone guarantees uninterrupted access until the payment has been verified and the subscription activated.

12 Cancellation

Subscribers may choose not to renew their subscriptions.

A subscriber who does not wish to continue should notify L2 Signals through the designated official contact or follow the cancellation procedure communicated during onboarding.

Unless a separate written agreement provides otherwise, cancellation stops future renewal obligations but does not automatically entitle the subscriber to a refund for a subscription period already paid for.

Any qualifying founding-member extension is governed by the extension policy. A subscriber may choose not to continue after using the additional access period.

Cancellation does not alter the official performance records for a calendar month.

13 Refunds and Service Extensions

Except where required by applicable law or expressly stated in a written agreement, subscription payments are not refundable once access has been activated.

The founding-member extension is a separate programme benefit and is not a monetary refund.

The extension does not reimburse personal trading losses, broker fees, spreads, commissions, or other costs incurred by subscribers.

Nothing in this section excludes any consumer rights that cannot lawfully be excluded under applicable law.

14 Service Availability and Maintenance

L2 Signals may perform maintenance, updates, strategy adjustments, or technical work required to maintain or improve the service.

Temporary interruptions may occur due to technical failures, connectivity issues, market-data availability, third-party services, or other operational circumstances.

Where reasonably practical, L2 Signals will communicate material interruptions through its official channels.

L2 Signals will take reasonable steps to maintain service availability but does not guarantee uninterrupted access or error-free operation at all times.

Technical interruptions do not automatically entitle subscribers to refunds or extensions unless required by applicable law or expressly provided under a separate written agreement.

15 Acceptable Use

Subscribers must not:

- Share members-only signals or access credentials with unauthorised individuals.
- Resell, redistribute, or commercially exploit L2 Signals content without written permission.
- Attempt to access restricted systems or internal engine components without authorisation.
- Interfere with the service, abuse technical infrastructure, or attempt to circumvent access restrictions.
- Misrepresent themselves as representatives of L2 Signals.
- Use the service for unlawful activities.
- Falsely represent official L2 Signals performance by altering, fabricating, or selectively misrepresenting official records.

L2 Signals may investigate suspected misuse and restrict or terminate access where a material breach is established.

Where appropriate, L2 Signals may provide an opportunity to remedy a breach before terminating access, unless immediate action is reasonably necessary to protect the service or its members.

16 Intellectual Property

The L2 Signals name, branding, platform, signal engine, software, proprietary strategy logic, documentation, and other original materials are owned by L2 Signals or used under appropriate authorisation.

Subscription access does not transfer ownership of these materials to subscribers.

Subscribers may use the signals for their own trading decisions but may not copy, reverse engineer, redistribute, or commercially exploit proprietary components without written permission, except where applicable law provides otherwise.

17 Privacy and Member Information

L2 Signals may collect and process information necessary to administer subscriptions, verify payments, provide access, communicate with members, maintain records, and address support requests.

Members should not submit unnecessary sensitive personal or financial information through public channels.

Further details about the collection, use, storage, and protection of member information will be provided in the L2 Signals Privacy & Acceptable Use Policy.

18 Changes to the Service or Terms

L2 Signals may update its service features, technical systems, documentation, and operating procedures as the platform develops.

Material changes to these terms will be communicated through appropriate official channels.

Unless required by law or expressly agreed otherwise, material changes will apply prospectively and will not retroactively alter completed performance calculations or previously determined extension eligibility.

Continued use of the service after a change takes effect may be subject to the updated terms, as permitted by applicable law.

19 Limitation of Responsibility

To the extent permitted by applicable law, L2 Signals is not responsible for losses arising from subscribers' individual trading decisions, execution deviations, broker conditions, market movements, leverage, or other factors outside its reasonable control.

L2 Signals does not guarantee that its signals will be suitable for every subscriber or that the service will produce a particular financial outcome.

Nothing in these terms excludes or limits liability where doing so would be unlawful, including liability that cannot lawfully be excluded under applicable law.

20 Governing Law and Disputes

The governing law and dispute-resolution arrangements for L2 Signals will be specified in the final published terms, taking account of the business's operating jurisdiction and applicable legal requirements.

Members should contact L2 Signals through the designated official channel to raise questions or disputes concerning subscription payments, access, official signal records, or programme eligibility.

L2 Signals will review disputes using the relevant subscription records, published signal instructions, and applicable policies.

21 Related Policies

These Subscription Terms & Conditions should be read alongside the following L2 Signals documents:

- Founding Members Programme.
- Performance Measurement Policy.
- Founding Member Extension Policy.
- Signal Access & Delivery Policy.
- Trading Risk Disclosure.

- Privacy & Acceptable Use Policy.

Together, these documents establish the rules governing subscription access, official performance measurement, member responsibilities, and the founding-member extension.

22 Acceptance of Terms

By subscribing to L2 Signals, making a subscription payment, or accessing the members-only service, you acknowledge that you understand and agree to the applicable terms.

In particular, you acknowledge that:

1. Subscription access does not guarantee profits.
2. Official platform performance is measured using the signal engine’s recorded outcomes.
3. Monthly net R resets at the beginning of each calendar month, independently of individual payment dates.
4. Your personal trading account results do not determine official platform performance or extension eligibility.
5. You are responsible for your own trading decisions and execution.
6. Changes you make to entry conditions, stop-losses, take-profits, or other signal instructions may produce results different from the official signal outcome.
7. The founding-member extension is conditional, applies only once, and is determined by the official monthly net R under the published programme policies.
8. Signal generation depends on market conditions and the signal engine’s predefined rules.
9. You should read the relevant policies before subscribing.

L2 Signals reserves the right to administer the service in accordance with these terms and its published policies, subject to applicable law.
